

Here is a note from the investigative reporter and DC news anchor Kathy Fowler who did a great job conducting the interview with Dr. Oz and Andy Wilson, producer of Under Our Skin, on Lyme Disease..... Kathy feels we need to do as much as possible to follow up on Dr. Oz's new found awareness and interest by contacting the Oprah through the contact links below, i.e. by posting on the message board or sending email as she suggests below.....the links for Oprah's show is and for the email and message board contact are listed below..... The link for the show is www.oprah.com/media/20081126_oaf_20081126_oaf_mo

I have attached the news release which summarizes the interview and Dr. Oz's very positive reaction to the documentary and to the epidemic. Kathy's directive to do more and how to do it is listed below in her note.

I think this is just great. Did you listen to the show tonight??

If you can put up a note in your office for all your patients to **see -- asking them to email Dr. Oz and to post a message on his message board that would be great.** Also if you can get any Lyme organizations to send to their email lists this information. **We need to flood Oprah's web site with Lyme emails.** Please spread the word!

ASK EVERYONE TO EMAIL HIM AGAIN SINCE THE SHOW HAS AIRED -- EVEN IF THEY EMAILED HIM BEFORE.... ALSO ASK THEM TO POST A MESSAGE ON HIS MESSAGE BOARD.

OZ EMAIL ADDRESS:

<https://www.oprah.com/plugform.jsp?plugId=495>

Also ask people to have their family, friends, co-workers, neighbors, anyone they know email Oz about Lyme disease.... ask him to do something on Oprah. He wants to see what kind of response he gets. If the response is big then he might do it on Oprah. We need to get every Lyme organization out there to get every member to email him.
